Bluetooth printing
(maintenance)

WORK PREFERENCE

Open to remote
opportunities

Vincent Dave Te

Flutter Developer | Software Engineer

PROFILE

Mobile developer with 7+ years of experience, specializing in Flutter and Dart across Android, iOS, and Windows. Builds and maintains POS, ERP, kiosk, and business applications with offline-first workflows, SQLite synchronization, and REST API integrations.

PROFESSIONAL EXPERIENCE

Software Engineer II

Bonfire Technologies and Solutions Incorporated

Sep 2022 - Present

- Primary developer of core Flutter POS workflows for Android and Windows: checkout, payments, reporting, and deployment configuration.
- Implemented SQLite persistence before background upload, synchronization retries, and failed-attempt tracking.
- Built Sirius Computation Engine from scratch using TCP and APIs; developed Windows kiosk ordering and POS integration.
- Enhanced queueing and kitchen display workflows; maintained features and modified existing Bluetooth printing functionality.

Software Engineer

Dynameyes

Jul 2021 - May 2022

- Developed and maintained Flutter and React Native/Expo apps, delivering features, API integrations, and bug fixes.
- Implemented RxDart and MobX state management and OneSignal push notifications; used TypeScript.

Mobile Developer

Ideahub Solutions Inc.

Sep 2019 - Jun 2021

- Independently developed ServicePro Client: discovery, booking and tracking, maps, notifications, and real-time communication.
- Built DocKoTo chat, uploads, notification routing, profiles, gallery, and history; integrated Firebase social sign-in.

Mobile Developer

Enkcir Wellness Products Trading

May 2019 - Sep 2019

- Maintained an ERP app and adapted website functionality for mobile using Ionic and Angular.

EDUCATION

Bachelor of Science in Information Technology

University of Mindanao
Davao City, Philippines | 2015 - 2019
